- Paint housing

Economic, cleanable bag filter

- Bag may be dusted and reused.
(always clean the bag according to local regulations)

Filtration

- **Bag filter**
Compartment bag, 15" x 19" 16"
65% to trap airborne particles
- **Air Flow**
 - *Variable speed control, 735CFM, allows you to adjust the unit for particles abatement on high to odor control on low*
 - *Air is aspirated through a 6" pipe inlet, a hose may be attached. It passes the carbon filter then the bag filter that retains fine particles*
- **Optional**
 - *Dual - 4" inlets*

Customize your filtration system by using either a 2" HEPA filter and 15 lbs of activated carbon, or 2 carbon filters of 15 lbs each.

*Recommended filter replacement schedule**
Prefilters, every 3 months
Carbon filter, 6 months to 2 years.
