The Power of Activated Carbon

Activated Carbon is the most safe, efficient, cost effective way to trap noxious gases and odors.

- Activated carbon adsorbs up to 60% of it's own weight in gases and odors*
- One pound of activated carbon has a surface area of 60 to 100 acres*
- Activated carbon is the adsorbant used in the best military gas masks*

A IlerA ir's Mass Activated Carbon Bed (MAC-B™) filters contain from 15 to 160 lbs of activated carbon adsorption power

No one gives you more!
