At **AllerAir Industries** we manufacture air cleaners for every possible air cleaning problem. We supply units with 7 to 80 lbs. of carbon. We supply HEPA and ULPA particle filters in combination with carbon or alone. We have germicidal UV lamp options and blend special impregnated carbons for specific volatile organic compounds. We supply restorator units and offer special ducting options. We have designed tactical air cleaners against hostile airborne threats.

***At AllerAir we are dedicated to bringing you healthy indoor air.***
