

Project 007

An Arsenal of Advanced Technology

The 007 cleans better, faster and more efficiently than similar leading air cleaners by combining AllerAir's superior deep-bed carbon + HEPA filtration system with 360° air intake and smart-seal compartments to ensure that all of the air is filtered. That means airborne chemicals, gases, odors and particles can't escape the ultra-efficient 007.

■ Why AllerAir Air Purifiers

Backed by unparalleled expertise in air quality control and a superior filtration system, AllerAir air cleaners are individually customized to target the airborne pollutants of concern in the environment. Our units offer more filtration media than any other manufacturer, with the deepest carbon bed filters for chemicals, gases and odors, and superior medical-grade HEPA filters for particle control.

■ Cleaner Indoor Air

Clean air is recognized as a vital component for overall comfort, workplace health and safety as well as productivity. According to research from leading organizations like the EPA, WHO and Health Canada, indoor air pollution may pose more of a public health risk in North America than outdoor air pollution.

■ Green Features

- All-metal housing
- Ozone-free filtration technology
- Energy efficient
- Refillable carbon canisters
- Styrofoam free
- North American sourced parts and materials
- North American assembly

Technical Specifications

Carbon Filter	18 lb., 2" depth
HEPA Filter & Pre-filters	Medical-grade HEPA filter, Pre-filter
Options	UV Light, Custom Carbon Blends
CFM	360 Free flow
Voltage	115V/60Hz or 230V/50Hz
Dimensions	21.5" (height) x 15" (diameter)
Shipping Weight	Approx. 55 lbs.
Available Colors	Black, White
